

SAP Software Engineer

Tanner Fanni

+36 20 229 6262

tanner.fanni@pannonjob.hu

Tasks

- Together with the business department you define logistic (line supply and warehouse) processes and implement these in modern S/4 HANA based applications consisting of EWM (extended warehouse management) or SAP ERP WM (warehouse management), SAP LE (Logistics Execution) and SAP TM (Transportation Management)
- Testing, integrating, rolling out and operating production critical applications as part of an international feature team utilizing agile methodology
- Collaborating with other teams and shaping the development of the new IT landscape based on S/4 HANA or adjusting our current systems based on SAP ERP
- You will be part of an environment which believes in lifelong learning with continuous exchange of knowledge to shape the future of the company

Expectations

- University' degree or equivalent in Information Technologies, Industrial Engineering or Mathematics with focus on IT or 3 years of SAP implementation experience in warehouse management processes
- Profound knowledge in SAP S/4 HANA EWM and WM modules, SAP LE (Logistics Execution) and SAP TM (Transportation Management) and ideally knowledge of ABAP and ability to debug in case of issues
- Fluent English language knowledge
- Knowledge in Cloud Technologies, Kafka and in collaboration toolkits (e.g., Jira and Confluence) in an agile environment
- Experience in agile working model and the ITIL framework as well as in leading cross functional workshops with IT and business

- Goal-oriented and structured way of working
- Willingness to travel

Preference

- Hungarian language knowledge

Co offer

- Bonus calculated based on corporate and personal results
- Annual cafeteria allowance paid out monthly
- Support for commuting
- Additional daily allowance for foreign training or business travel, which is higher than the legally prescribed amount
- Access to high-level healthcare services at the company's Health Center, thematic health programs, physiotherapy, and therapeutic exercise options
- Professional and language training courses
- Subsidized meals at the company cafeteria
- Employee car leasing program

Other

- Working location: Debrecen
